**New silicone-free tape: U90 silicone-free**

Kerafol GmbH has developed a new silicone-free film, with a very high heat transfer rate of 6 W/mK. The U90 film shows its strengths through excellent thermoplastic properties and a perfect surface.

- Ready to ship from 0.1 mm to 0.5 mm
- Meets RoHS Conformity

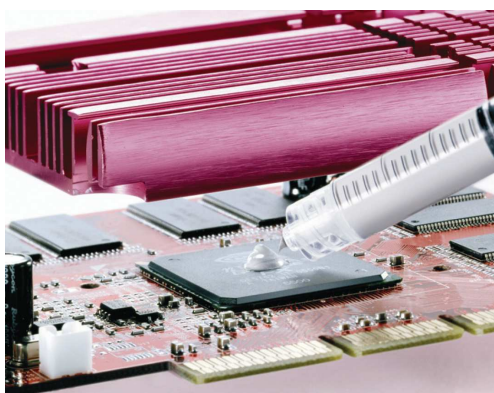

**New Sofftherm® film: 86/202**

This Material presents itself with an excellent price to performance ratio, good thermal transfer and dielectric properties. It also possesses very good plasticity due to a low shore-hardness.

- UL / VO listed
- Meets RoHS Conformity

**New silicone-free Thermal Grease: KP 12 silicone-free**

For use in silicone sensitive applications. KP 12 shows long-term stability with no drying out or melting problems. Excellent heat transfer properties due to low application pressure.

- Very effective due to low density
- Meets RoHS Conformity

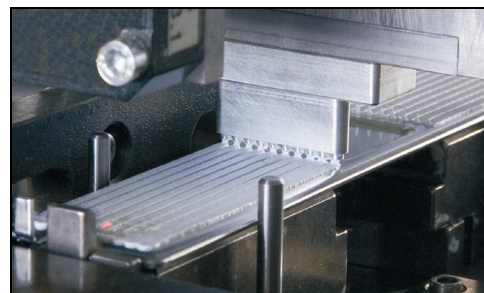

we accept:

**New Dispensing and Sealing Compounds: Keratherm® Soft**

**Contact Information**

**All-around Service by Kerafol®**

Kerafol is able to offer you not only cutting edge materials but a complete service spectrum as well. For example the application of Keratherm dispensing materials. We offer industrial production lines and technical facilities for customer specific solutions.

**Discover our broad range of products and take advantage  
of the diverse application possibilities!**

*Contact us for detailed information, technical data,  
“Low-Cost” solutions & product samples.*
