

Date: **2008-07-01/ra**

Subject: **Products acc. EC directive 2002/95/EC (RoHS) from 2006-07-01  
and the advanced version from 2008-07-01**

---

Dear clients,

on 2006-07-01 the above mentioned EC directive for **Restricted using of Hazardous Substances** in electric- and electronic devices became effective as a binding request for all manufacturers.

Since 2005-10-01 all our products are manufactured acc. to RoHS.

**That includes also the advanced version from 2008-07-01, what additionally restricts using of Deca-BDE.**

To the best of our knowledge, all our raw material suppliers do not use any hazardous substances acc. RoHS directive in the manufacture of their products.

We intend to use as our standard solder quality: **S-Sn99,3Cu0,7-t**  
Flux agent: **Multicore PC26**.

For further questions do not hesitate to contact us.

With kind regards  
**MAGNETEC GmbH**
